Thought Leadership

TranzAct's depth of experience and extensive data warehouse has consistently allowed us to identify trends and anticipate future needs. That ability has enabled TranzAct to consistently be first to market with innovative solutions.

Transportation Network

We bring a team of experts from around the industry, able to address your specific needs. TranzAct's triangular relationship with our clients and carriers allows us to bring unparalleled efficiency to the sourcing, management, and payment processes.

Leading Technology

TranzAct has developed the most comprehensive end-to-end technology that exists in the marketplace today. Freight Payment and TMS solutions provide shippers with maximum control.

Performance. Not Promises.

TOTAL Transportation Spend Management

Combining data, technology and expertise to help you make intelligent decisions for your supply chain.

Freight Audit & Payment

Drive savings with automated processes that minimize exceptions, audit 100% of your bills, and data that delivers insight into your transportation spend.

Rating & Routing

Our StarRate tool allows you to quickly compare rates across carriers. The first web-based tool of its kind remains the industry leader.

Constellation TMS

Create, manage, and track your shipments with ease, all in one simple application. Securely hosted in the cloud, our Transportation Management System allows instant communication with your carriers through tendering alerts and online load acceptance or rejection.

Freedom Logistics

We will benchmark your LTL and truckload rates and identify savings through our buying power. We contract the rates with the carriers, while you retain control of shipping activity.

Truckload Brokerage

The TranzAct network will help you find the trucks you need when capacity is tight. We provide support for last-minute, seasonal, and hard-to-move loads.

Parcel Analysis

Our tools allow you to analyze your Parcel spend at any given moment, allowing you to see the impact of potential rate increases, compare rates across carriers and contracts, and identify inefficient shipping practices.

Carrier Monitoring

Our Shipper Shield system allows you to know your carriers measure up to safety standards, protecting you from vicarious liability risk.

Sourcing & Custom Tariff Development

Our extensive expertise and network allows us to analyze your overall transportation spend and help you identify savings. Before you conduct your next LTL/Truckload RFP or contract negotiation, get help from our experts.
